

## 'Bring Your Own Device' Purchase Program

Dear Parents/ Carers

The focus of the Bring Your Own Device (BYOD) program at Allansford & District Primary School is to provide resources to the 21st-Century Learner.

The school is offering a BYOD purchase program for students in grades 3 to 6. The program has been running since 2017 and again we are offering it to students in Grade 3-6 for the coming 2022 school year.

This involves purchasing an **iPad** for learning at school for the remainder of your child's primary schooling. The BYOD program provides your child with exclusive use of their own device whilst at school, and can be used at home, as it belongs to you. We hope the BYOD program enhances your child's learning at school and develops their digital literacy. Teachers aim to incorporate digital learning through the school curriculum. Technology immersion does not diminish the vital role of the teacher. On the contrary, it transforms the teacher from a director of learning to a facilitator of learning.

BYOD iPads are synchronized with the school's server so students can access the many apps approved for school usage to support student learning.

Allansford and District Primary School has a partnership with the School Locker to provide a portal where parents/carers are able purchase an apple device and cover.

Please see our school website to attain further information on how to purchase a device.
